Research Associate-Kansas State University

The Department of Chemistry invites applications for two research associate positions. The successful applicants must have a Ph.D. in synthetic organic chemistry with experience in organic synthesis and characterization of peptides, such as surface plasmon resonance and atomic force microscopy, and some experience in protein inhibition would be ideal.

These research associates would carry out laboratory research in the synthesis of bioactive molecules and carbon nanotubes, characterization of proteins and nanostructured materials, and performing binding studies of proteins and small molecules.

Applicants should submit a resume and letters of reference to Professor Duy H. Hua, Department of Chemistry, Kansas State University, 111 Willard Hall, Manhattan, Kansas, 66506. Phone enquiries can be made to 785-532-6699. Screening will commence on February 1, 2007 and continue until suitable candidates are found. Details of the department can be found at http://www.ksu.edu/chem. Kansas State University is an equal opportunity employer and actively seeks diversity among its employees.
