Biomolecular NMR Facility Phase II Training Plan

New user NMR training at BioNMR Facility is available during Phase II research period. The training covers BioNMR Facility user policies, NMR safety, basic 1D and 2D NMR experiment setups, and data processing. It will be one user training at a time. Key points are the following:

2. New users should request and schedule the training by email.

3. The training consists of several 15 min sessions with 5 min break between the sessions.
   The whole training takes about 2 hours.

4. During the training, both parties must wear masks and keep six-foot social distance.

5. The trainee is expected to take notes and is strongly encouraged to ask questions if feeling unclear on training material.
